

ProPac® vs HyTRON® 100: Increased Capacity for ProPac Users

As most are aware, the [ProPac](#) series was discontinued as of April of 2010. While there is still limited stock available, the issue now becomes what to replace it with.

The [HyTRON 100](#) is a perfect jump for all ProPac users and is now more cost effective than ever.

- The ProPac is a 65 watt hour battery. The HyTRON 100 (a 100 watt hour battery) provides you with over 50% more capacity at only a 25% increase in cost. The ProPac has a list price of \$355.00 USD and the HyTRON 100 is \$429.00.
- The Hytron 100 has a [3 year MAXX Warranty](#) and can handle up to 175 watt loads, just like the ProPac.

Note:

Contact Customer Support at support@antonbauer.com or call (203)-925-4991 to ensure that your current charger can be upgraded to charge the HyTRON series.

Tandem® 70: Issues Starting Panasonic HPX 300/370 Cameras

Anyone that has a [Tandem 70](#) and a Panasonic HPX 300/370 camera has experienced an issue with the Tandem 70 not starting the camera. There is a conflict with the way the camera wants to start and the way the Tandem 70 delivers power to the camera.

- The Tandem 70 has been updated at the factory starting with Serial Number 24094. If your unit is below this number please contact the Customer Support Group for details on how to get your Tandem 70 upgraded. We have a free update that will need to be installed if you have experienced this issue.

VCLX Family: Changes to All CINE VCLX Products

Anton/Bauer has always listened to their customers and has once again made a change based on that feedback:

- The [CINE VCLX](#) battery will now have: (2) 4p XLR for 14.4v and (1) 3p XLR for 28v.
- VCLX Series batteries now have an ON/OFF switch to aid in your storage needs. The ON/OFF switch allows you to shut the battery off, allowing for longer storage with minimal capacity loss.
