

Update for **Airplane Carry-On** of the Dionic 160:

Due to the new rating of 168 Wh for the Dionic 160, batteries beginning with serial # **35288** cannot be carried on the airplane for international travel or airlines that comply with IACO/IATA regulation for their travel restriction. Under DOT regulation, however, up to 2 Dionic 160 can be carried on US domestic flights. (Note: It is always best to consult with airlines before carrying Dionic 160 as a carry-on item.)

This new rating does NOT affect shipping requirements; all shipping requirements remain the same.
