Featured Products

MATRIX Cheese Plate shown with QRC-EPIC

Power Solutions for Panasonic AF100, RED EPIC, Sony F3 and Canon DSLRs

The **MATRIX CHEESE PLATE** mounts on 15mm or 19mm rod systems to be used with Anton/Bauer Gold Mounts such as:

- **QRC-DUAL PT** – with 4-pin XLR and two PowerTap® outputs for Sony F3, AJA Ki Pro Mini and other “cheese plates.”
- **QRC-EPIC** – for the Red EPIC featuring two PowerTap outputs, power cable and 6p LEMO power connector.
- **QRC-DLSR** – for Canon 5D, 7D and 60D cameras
- **QRC-VBG** – for the Panasonic AG-AF100

DIONIC® HCX

With a 124 watt-hour capacity and the ability to sustain a 10amp load, the DIONIC HCX will run a 40 watt camera with a 25 watt light for almost 2 hours. The new motion detection feature incorporates a “deep sleep” setting that reduces battery self-discharge. To provide precise run-time data, an enhanced RealTime® LCD fuel gauge has been incorporated to display up to nine hours of run-time (under low power conditions).

TANDEM® 150

The Tandem 150 Modular Power system provides ultimate flexibility for shoots in isolated areas offering two unique methods to charge any Logic Series® battery.

The CA-TMCL is the smallest portable car charger on the market and does not require an inverter. Simply snap on the QR-TM bracket and plug it into the vehicle's power outlet. In addition, for productions where sunlight is available, batteries can be charged with the award-winning Anton/Bauer Solar Panel. This fully automatic system also allows a user to simultaneously charge a battery and power a camera. Weighing just two and a half pounds, the Tandem 150 is the smallest and lightest charger and on-camera power supply, as well as the only on-camera AC power supply over 100 watts without a fan available on the market.

QBH-HD

An accessory for the video/film dual voltage world which uses four of the same type of Logic Series Batteries. The QBH-HD will output both 14.4 and 28.8 Volts simultaneously - bridging the power gap between HD video cameras and film accessories. The 28 volt output can handle HMI lighting as well as most film cameras. QBH-HD features (3) three 4p XLR outputs @ 14.4 volts and (1) single 2-pin Amphenol output @ 28.8 volts. 10 amp externally replaceable fuse.
