

Pro V-Mount Battery Bracket Blackmagic Design (Pocket Cinema Camera 4K / 6K)

SKU: 8075-0306

PRODUCT DESCRIPTION

Pro V-Mount (BMPCC4K / BMPCC6K, Blackmagic Pocket Cinema Camera 4K / 6K) battery power plate with a rugged aluminum body for durability and secure battery mounting and a DC connector compatible with the Blackmagic Pocket Cinema Camera 4K. Features 3x P-Taps for accessory power at battery voltage (12-16V), a digital fuse with reset button, rear cover plate, and captive mounting screws.

Should the user exceed the set current for accessories, only the accessory outputs are disabled leaving the camera running normally. Once the current load has been reduced by either removing accessories or reconfiguring, the reset button can be pressed to enable accessory power again.

Cable exits the right side of the plate allowing neat looping and insertion into the camera. The 16" cable length minimizes cable excess while still being able to reach positions further away from the camera as necessary.

For an adjustable mount system, use the Universal Mounting Plate for rail mounted cameras – MATRIX Cheese Plate
