

Pro V-Mount Battery Bracket Blackmagic (URSA Mini, URSA Mini Pro, URSA)

SKU: 8075-0266

PRODUCT DESCRIPTION

The Pro V-Mount (Blackmagic URSA Mini, URSA Mini Pro, URSA) is a metal power plate, with a rugged aluminum body for durability and secure battery mounting and a Blackmagic URSA Molex connector. Features 3x P-Taps for accessory power at battery voltage (12-16V), a digital fuse with reset button, rear cover plate, and captive mounting screws. Special Molex connector attaches directly to back of Blackmagic URSA and is covered by the plate eliminating external cabling.

Should the set current for accessories be exceeded, only the accessory outputs are disabled leaving the camera running normally. Once the current load has been reduced by either removing accessories or reconfiguring, the reset button can be pressed to enable accessory power again.
