

## Titon Micro 150 V-Mount

**SKU:** 8675-0168

- 47Wh, 94Wh or 140Wh lithium-ion battery
- Gold-Mount or V-Mount options
- 47Wh 8 A continuous draw
- 94Wh and 140Wh 10 A continuous draw
- P-Tap combined output and charging port
- High-speed USB port
- One touch LED fuel gauge shows battery status

## PRODUCT DESCRIPTION

When size and weight is critical, but power is paramount Titon Micro delivers the extended power you need to run cine cameras and mirrorless systems for hours in the smallest ever 14.4V battery from Anton/Bauer. With a consistently reliable 10A continuous current, Titon Micro 150 will power a RED Komodo for over three hours or will run cameras including Canon C100 and Sony a7R for over 18 hours, with the Dual Micro Plate runtimes can double and allow hot-swapping to provide continuous power – perfect to capture a full day of action and adventure off the grid.

### **Ultra-compact, lightweight battery.**

Run cameras, monitors, lights and more

Power the widest range of production gear with one versatile Micro battery. Available in Gold-Mount or V-Mount options, the compact micro shape takes up less room in your case and perfectly complements cameras such as the Canon C100 or Sony Alpha mirrorless range. The P-Tap port and a USB port – with integrated Apple ID for rapid charging - provide power for camera accessories including monitors, LED light panels, transmitters, follow-focus or a welcome boost for your phone or tablet at the end of a long day.

### **Intelligent 5-step LED fuel gauge.**

Battery status confirmed at the touch of a button.

Plan shooting down to the minute with no sudden shutdowns. Titon Micro displays battery status with a simple button tap on the built-in intelligent 5-step LED fuel gauge and compatible cameras can show the remaining runtime in minutes in the viewfinder leaving camera operators free to focus on the action in front of the camera.

### **Dual battery micro plate.**

Double your runtime in half the size.

Continuous hot swap shooting. Create up to 300Wh of power in the same space as one regular-sized 14V battery with the optional dual battery micro plate. Two powerful Titon Micro batteries can be mounted together and hot swapped to provide continuous shooting all day with no need to power down to change a battery.

## TECHNICAL SPECIFICATIONS

<b>Range</b>	Titon
<b>Height</b>	10.1 cm   3.98 in
<b>Width</b>	75 mm   2.95 in
<b>Depth</b>	68 mm   2.68 in
<b>Weight</b>	0.79 kg   1.74 lb
<b>Mount Type</b>	V-Mount
<b>Chemistry</b>	Lithium-ion
<b>Voltage</b>	14.4 V
<b>Capacity</b>	140 Wh
<b>Power Tap</b>	Yes
<b>Max Current</b>	10 Amps
<b>USB</b>	Yes
<b>Warranty</b>	2 Years / 65% of Learned Capacity
