

## Installing The Vitec Videocom Charger Updating Tool

1 – Select the AntonBauer Performance Quad Update and click the Download icon

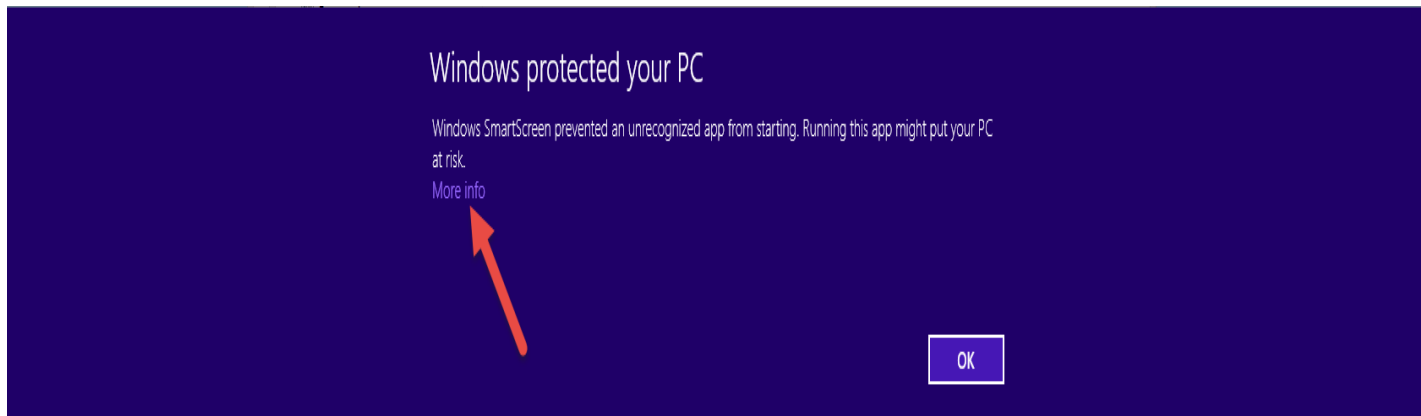

Save the download to your computer. Then Open Folder.

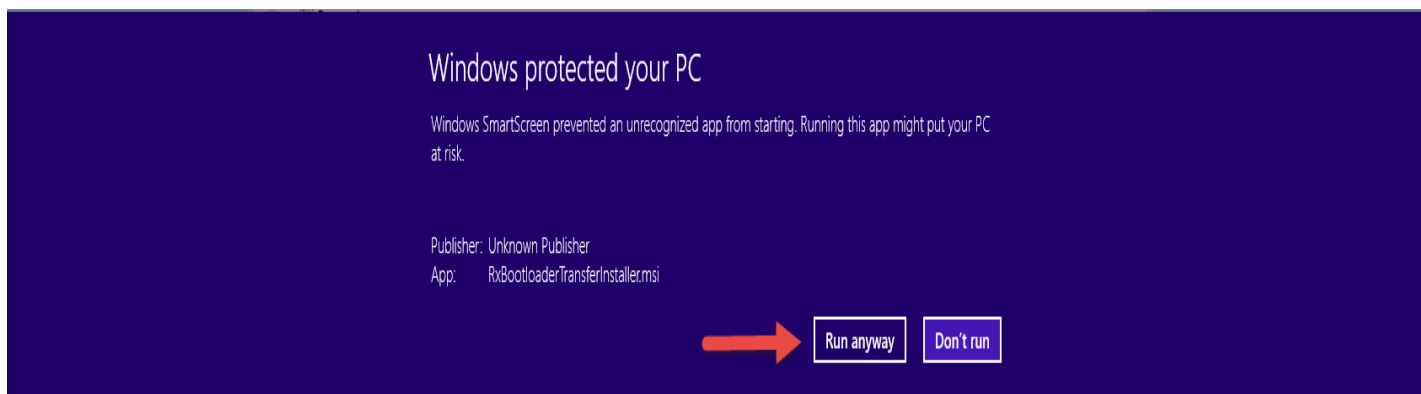

Double click the RxBootloaderTransferInstaller file

If you are running Windows 8 or 10, you may see the following message

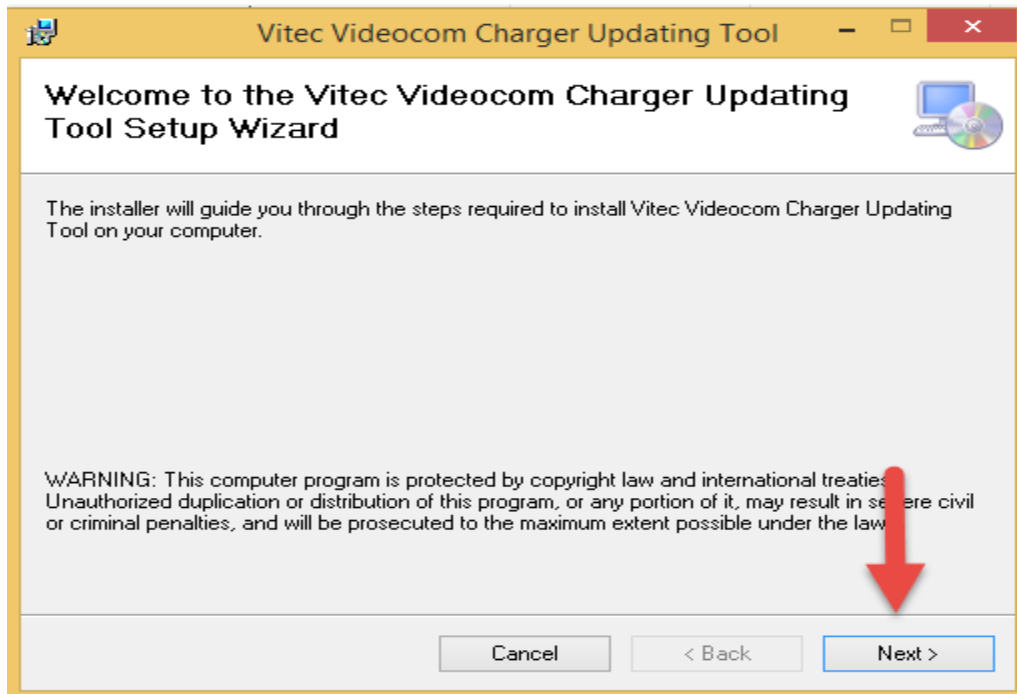

Click More Info

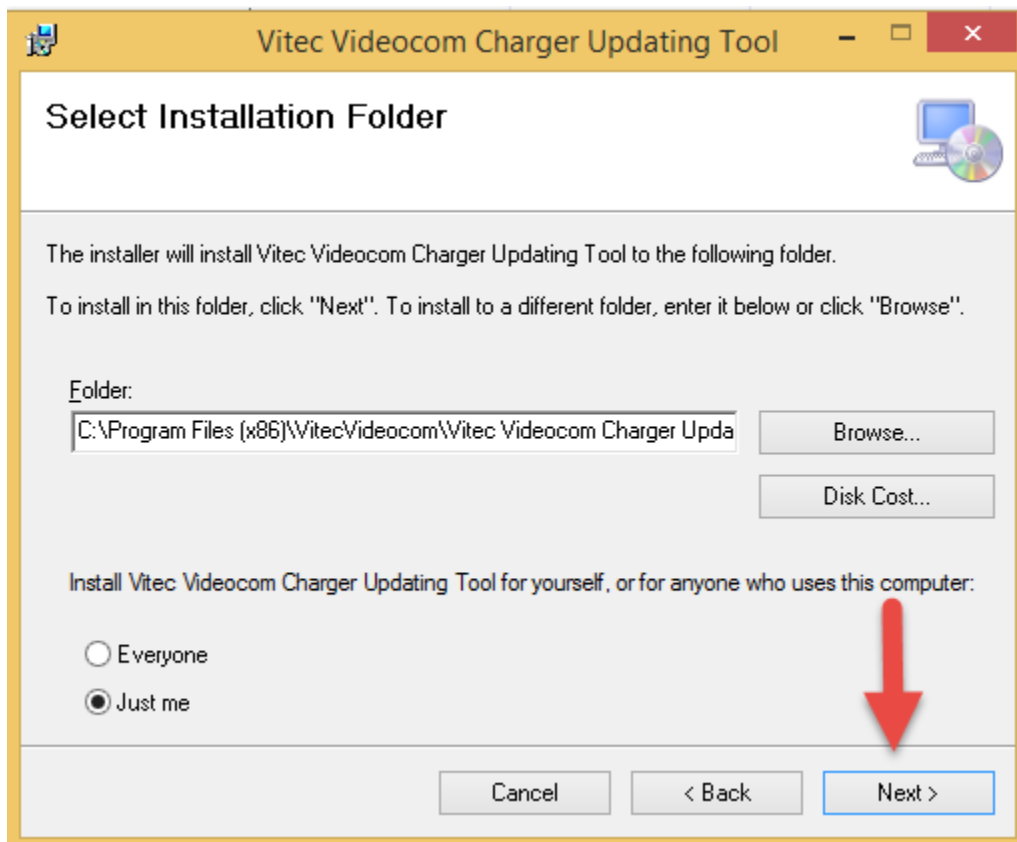

Click Run Anyway.

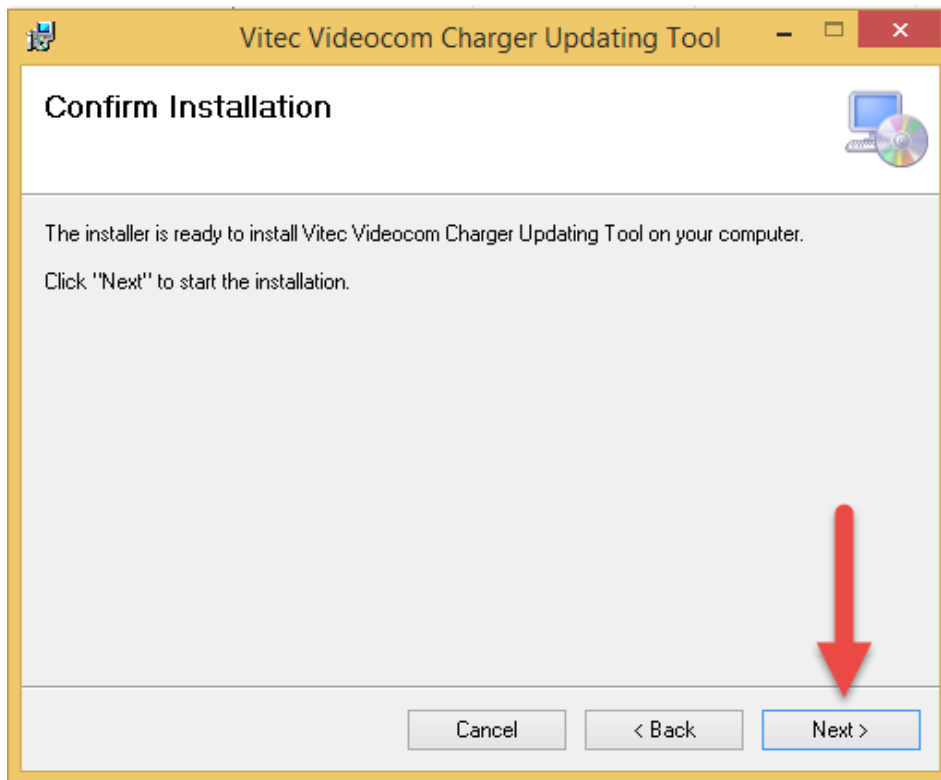

You will now see the start of the install process

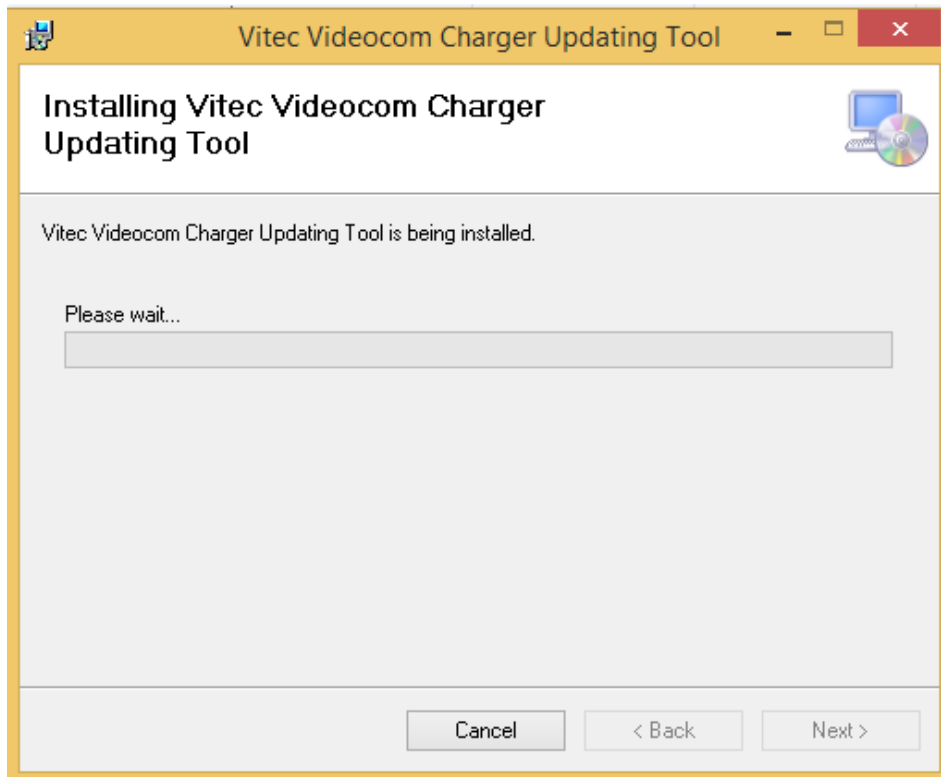

Click next

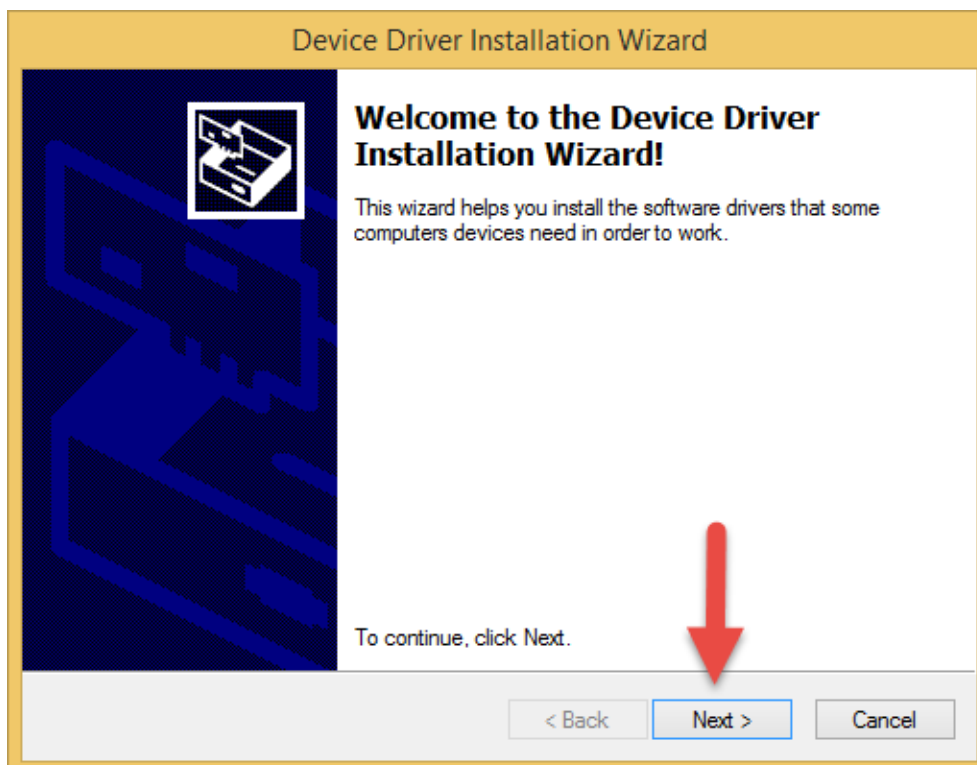

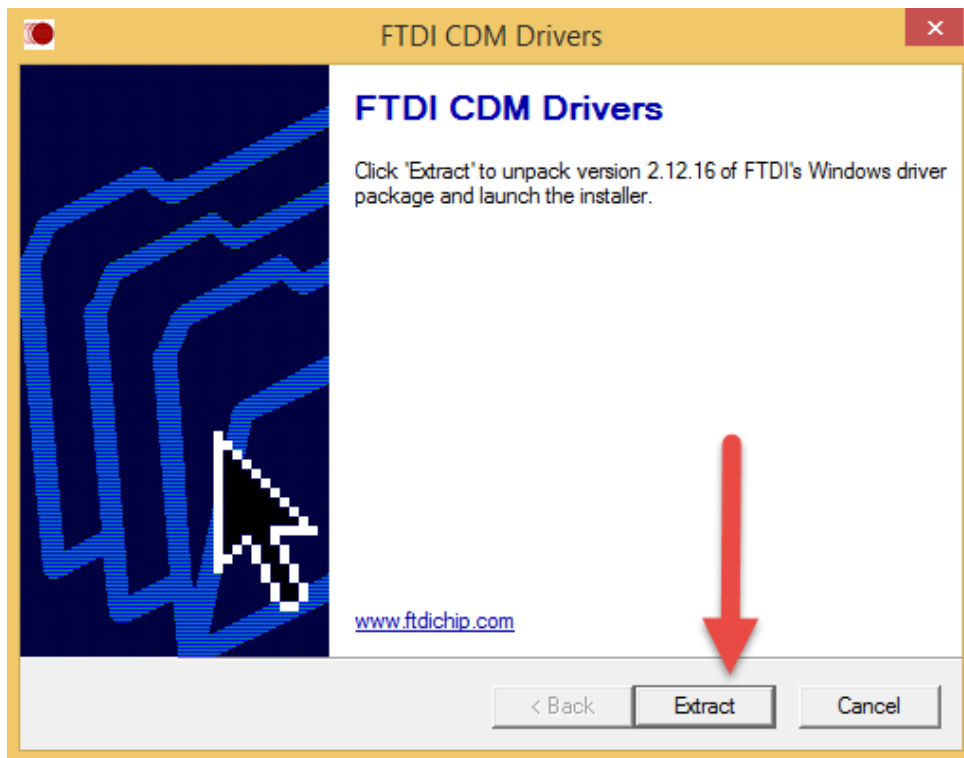

Click Next

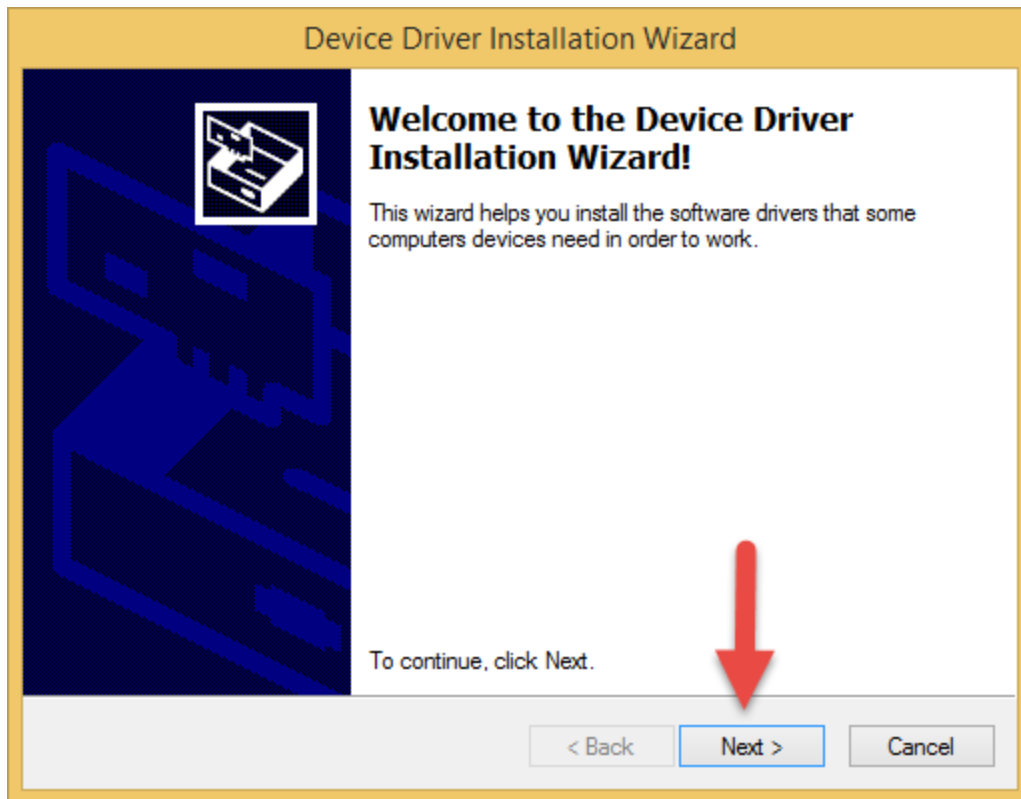

Click Next

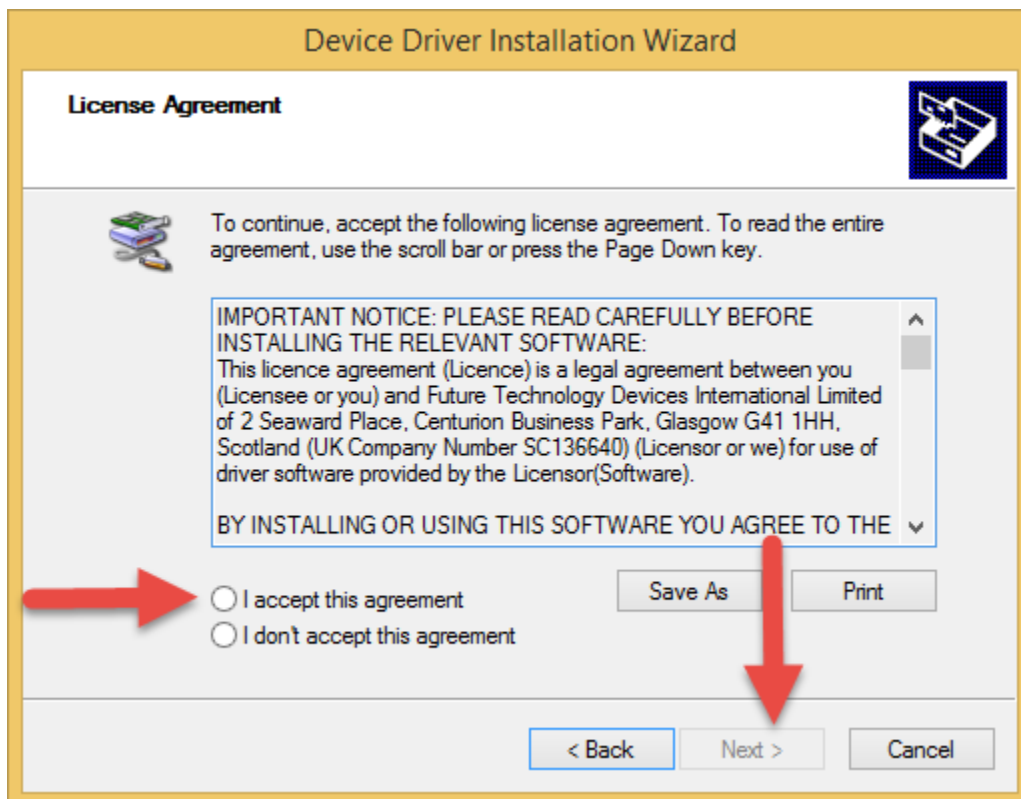

Wait for the install to progress to the next step. Click next when complete

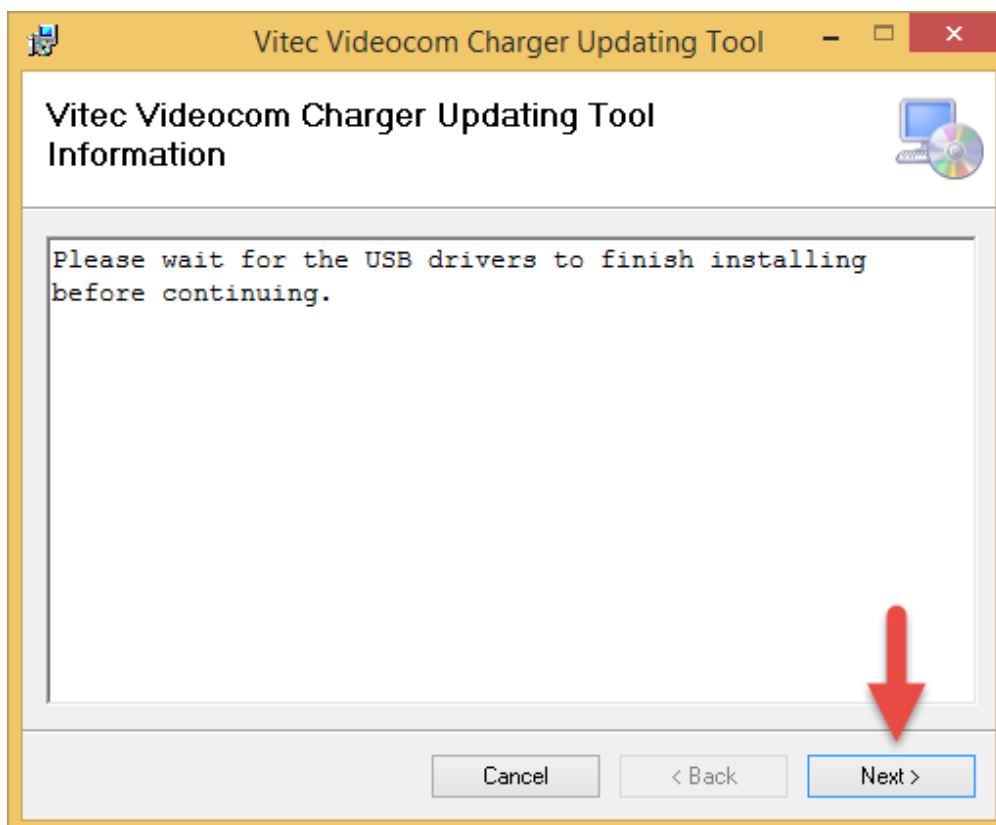

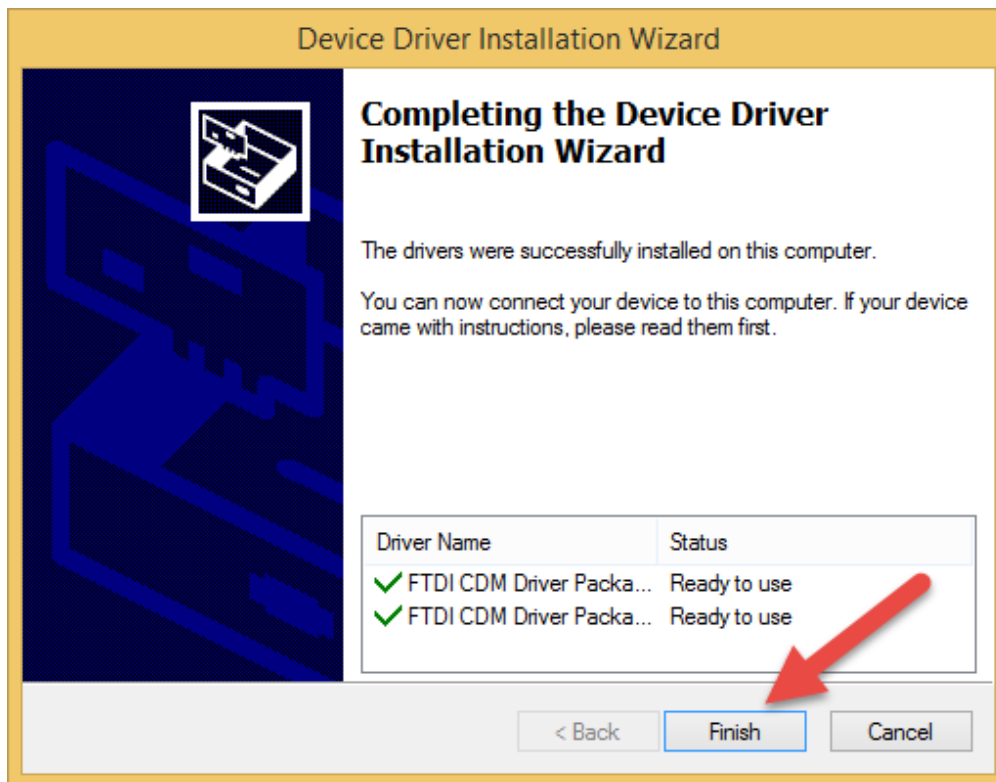

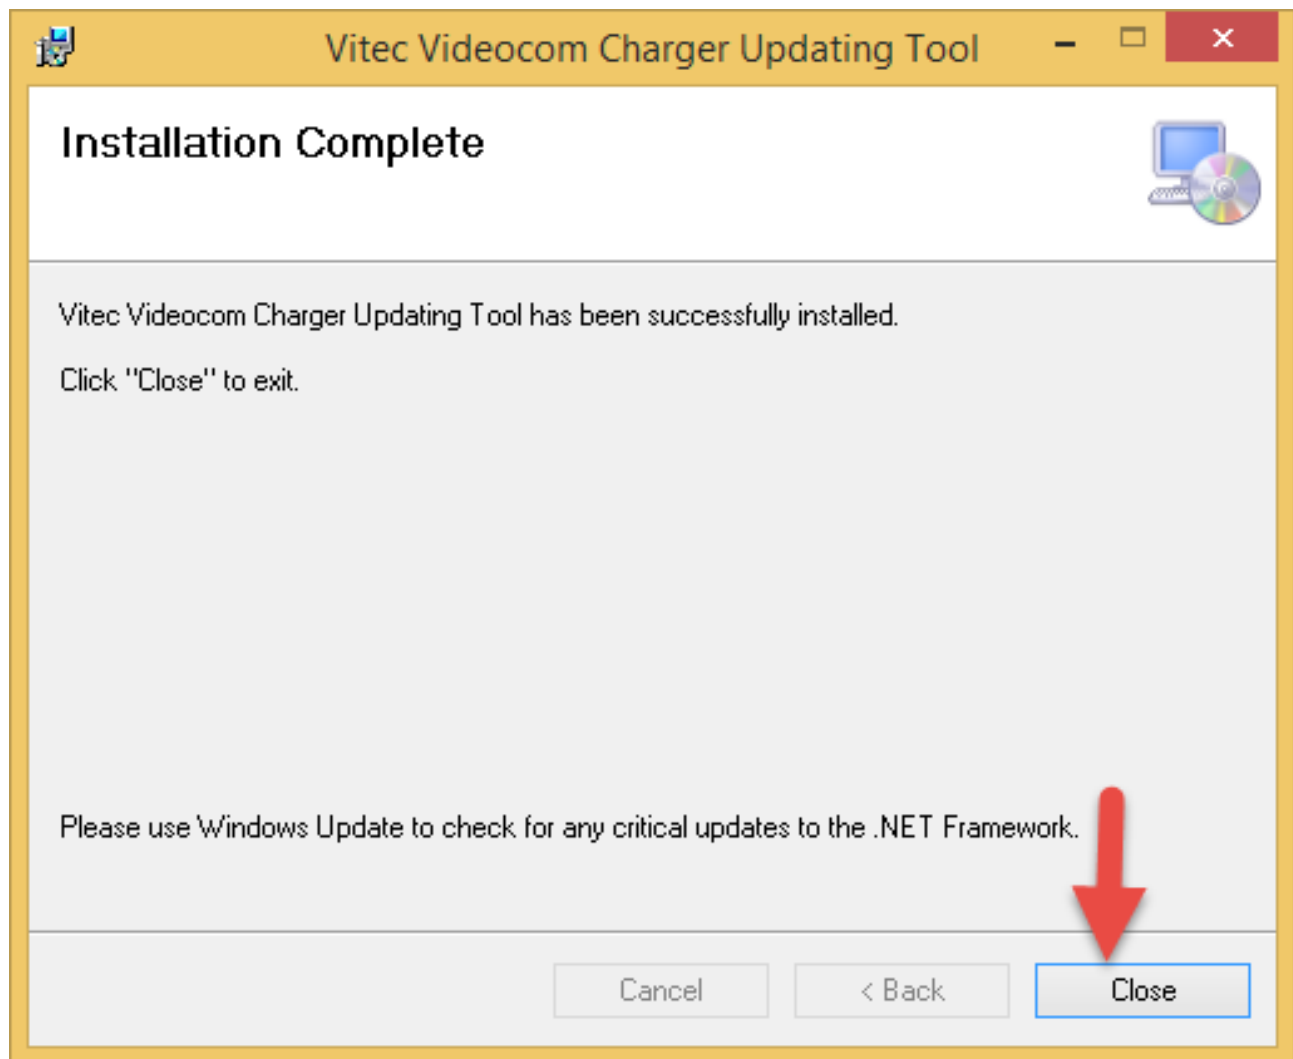

You will now be prompted to install Drivers. Click Next.

Click Accept and then click Next.

Click Next

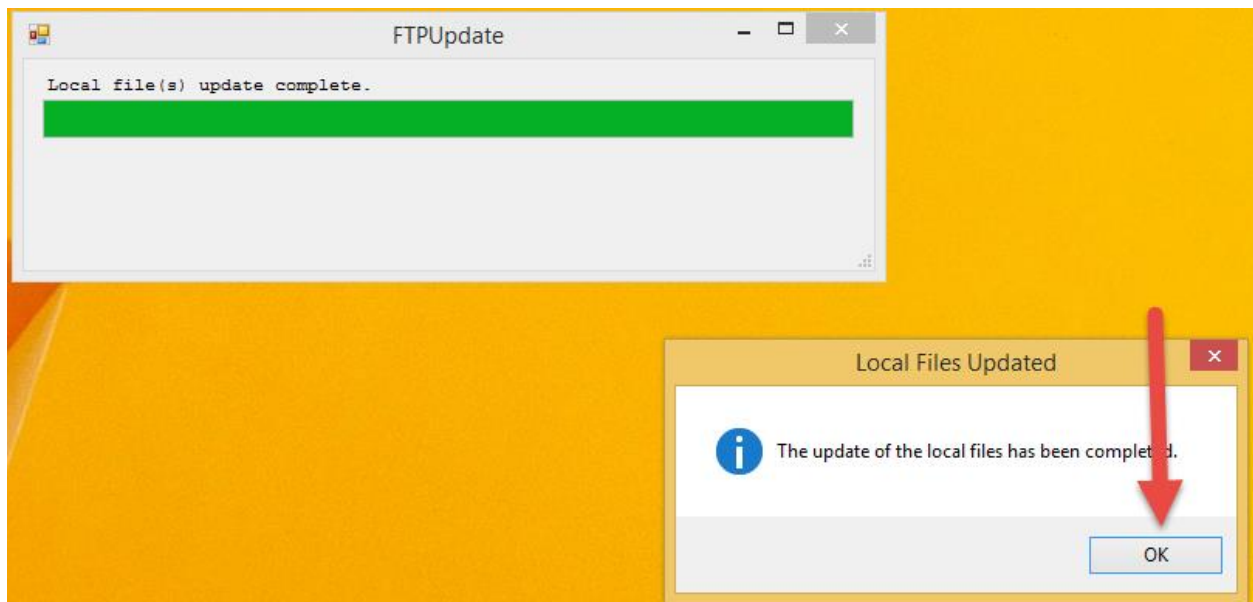

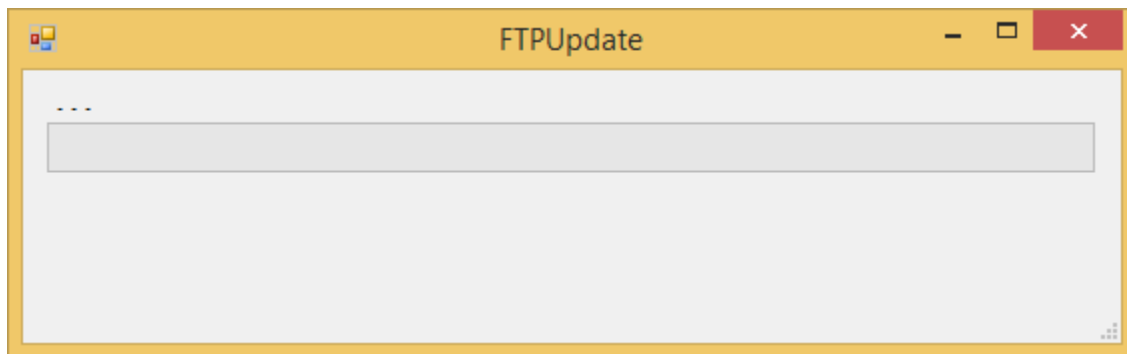

Installation Complete, Click Close.

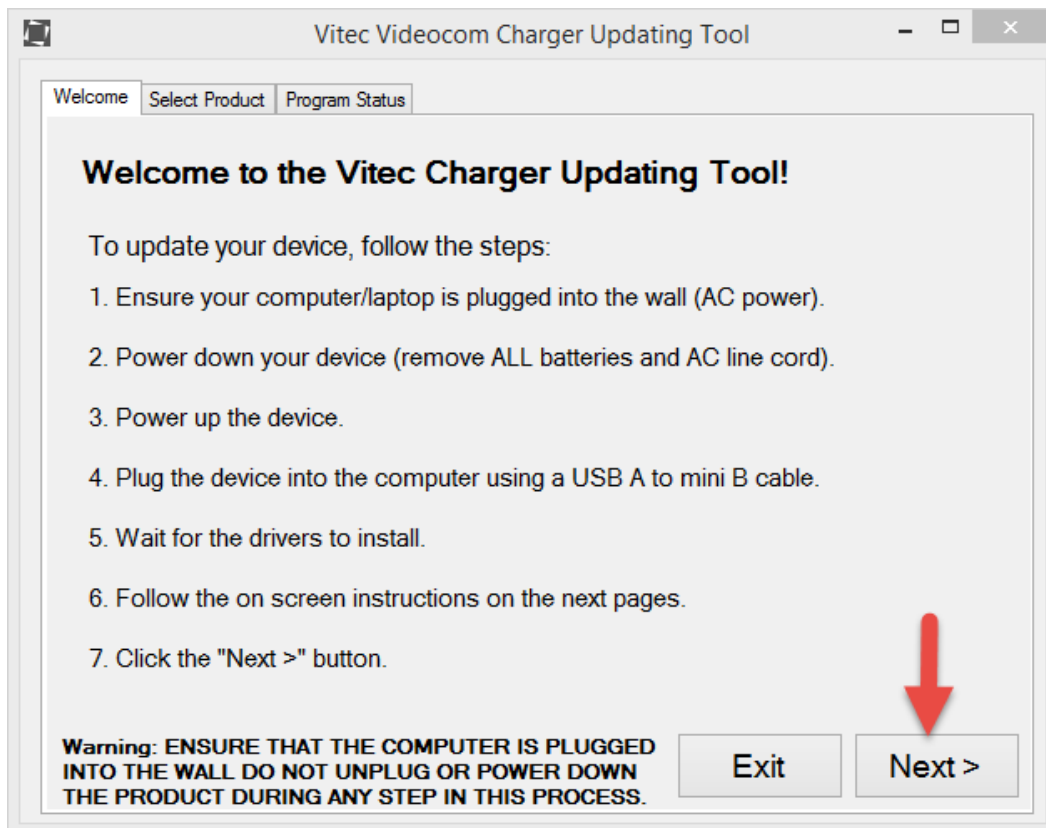

The Vitec Videocom Charger Updating Tool can now be found on your Start bar.

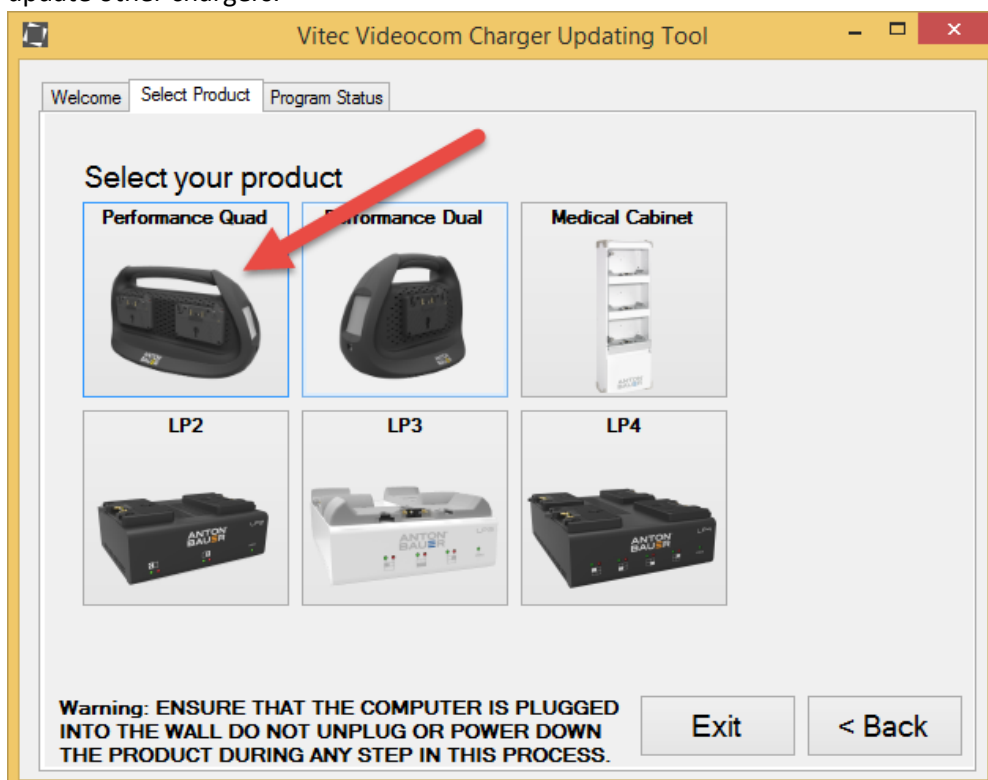

When you first open the program, it will download the latest firmware.(this may take some time) Click OK when complete

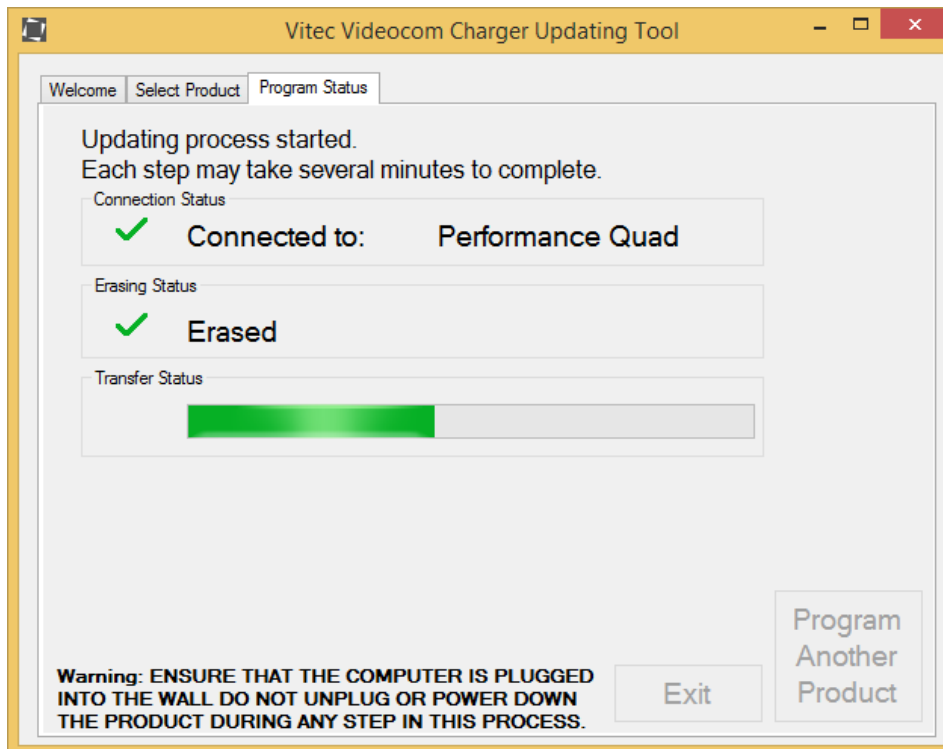

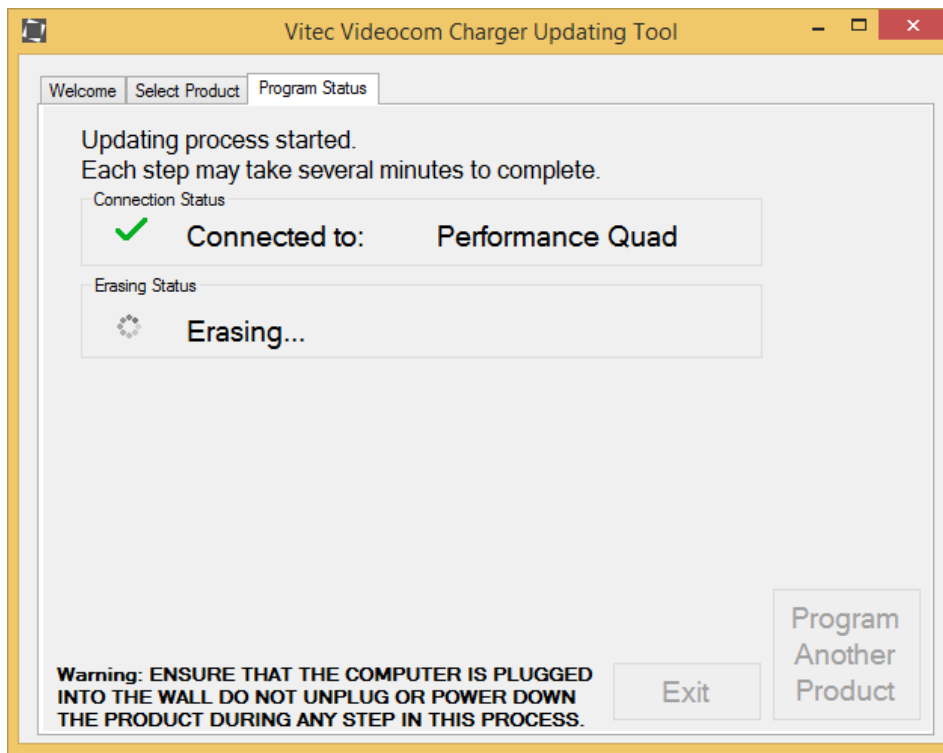

You will then see the Main window. Follow instructions carefully and click Next when complete.

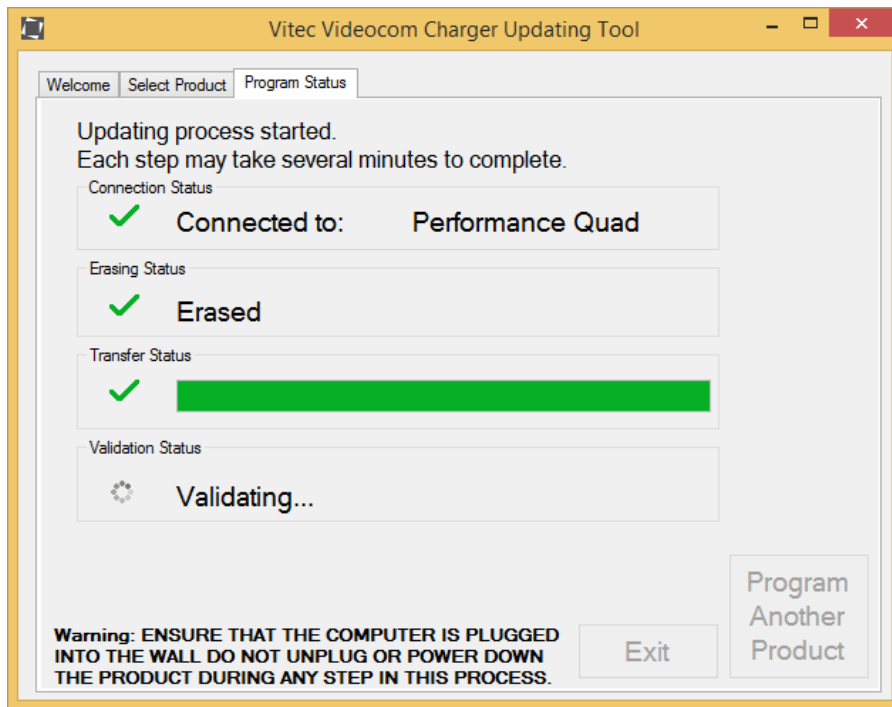

Select your product. It is VERY important that you choose Performance Quad. Do NOT attempt to update other chargers.

The upgrade will then start. It will progress as shown in the next few pictures...

During this Process, your Charger will Restart at least once. DO NOT Unplug

When the Upgrade is complete, you will see the screen below, you can:

1. Exit the program
2. Update more chargers
